

FICHA TÉCNICA

GK-SEA KLINER i

Degreaser

DESCRIPCIÓN

GK-SEA KLINER is a low-toxicity degreasing product based on solvents with biodegradable surfactants.

GK-SEA KLINER is a highly concentrated tank cleaner with strong emulsifying properties and fast penetration.

GK-SEA KLINER rinses off easily, leaving surfaces clean and oil-free.

GK-SEA KLINER is very economical since it is used in highly diluted form.

CAMPOS DE APLICACIÓN

Cleaning of ship tanks. Cleaning of fuel and oil containment booms. General degreasing for cleaning oiled or greased parts and surfaces. Internal cleaning of fuel storage tanks.

MÉTODOS E INSTRUCCIONES DE USO

Direct injection or recirculation method for tank-cleaning machines, from 0.1% to 0.2% in water.

Best results are obtained when the water temperature is between 60–80°C.

It can also be used by spraying.

For general degreasing, use at 20% in water.

PROPIEDADES FÍSICO-QUÍMICAS

Color: Yellowish

Odor: Characteristic

Density: 0.815–0.835 g/ml

Water solubility: Emulsifiable

MODALIDAD DE SUMINISTRO

Envases: 25 y 220 litros

Contenedor: 1000 litros
